## DETAILED ACTION

### *Reasons for Allowance*

1. Claims 107, 108, 129 and 131-168 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 107 and 108, the prior art reference **Wenk** fails to teach automatically setting the first wireless communications unit of a telephone set to receive calls from a mobile communications network at a phone number of second wireless communications unit which is a user's pre-existing mobile telephone number. **Wenk** teaches programming a personal base station [i.e., telephone set] with a telephone number of a subscriber terminal [i.e., second wireless communications unit] such that any call made to the terminal will be forwarded to landline telephone number of the personal base station through land line communication network (PSTN) (see abstract; fig.1; col.5, lines 46-58). There is no teaching or motivation to combine **Wenk's** invention by the teaching of any other reference to set the first wireless communications unit of a telephone set to receive calls from a mobile communications network as claimed. **Wenk's** invention does not need to set the first wireless communications unit of a telephone set to receive calls from a mobile communications network.

Regarding claim 129, the prior art reference **Wenk** fails to teach automatically setting the first wireless communications unit of a telephone set to receive calls from a mobile communications network at a phone number of second wireless communications unit which is a user's pre-existing mobile telephone number read by the reader from removable storage medium. **Wenk** teaches programming a personal base station [i.e., telephone set] with a telephone number of a subscriber terminal [i.e., second wireless communications unit] such that any call made to

the terminal will be forwarded to landline telephone number of the personal base station through land line communication network (PSTN) (see abstract; fig.1; col.5, lines 46-58). There is no teaching or motivation to combine **Wenk**'s invention by the teaching of any other reference to set the first wireless communications unit of a telephone set to receive calls from a mobile communications network at a phone number read by the reader from removable storage medium as claimed. **Wenk**'s invention does not need to set the first wireless communications unit of a telephone set to receive calls from a mobile communications network.

Since, claims 131-168 are dependent claims, these claims are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
